VO QUANG THANH

Fullstack Developer

An Phu, Ho Chi Minh • voquangthanh2004@gmail.com • 0363276943
GitHub: https://github.com/vqt2129a• Portfolio: https://quangthanhdev.vercel.app/

Education

Binh Duong Economics and Technology University — Ho Chi Minh City.
Bachelor of Information Technology

Skills

Technical: C#, JavaScript, TypeScript, SQL, Python.
Frameworks & Libraries: ReactJS, NodeJS, ASP.NET MVC, Web API, Tailwind CSS.
Database: SQL Server, PostgreSQL.
Tools: Git/GitHub, Docker, Postman, JWT Authentication.
Languages: Vietnamese, English (Highly capable of reading, researching, and comprehending technical documentation).
Core Competencies: Analytical Problem-Solving, Cross-functional Collaboration, Self-directed Learning, Time Management under pressure.

Experience

Fullstack Developer

ITECCOM Technology Company Limited — Ho Chi Minh City.

10/2025 – 03/2026

- **Digital Signature Platform:** Designed and implemented a contract signing platform using **.NET**, supporting both single and bulk/batch signing operations. Managed the complete document lifecycle including signer configuration, PDF assignment, dynamic signature placement (image-based and USB Token), and automated email notifications. Built robust backend logic and **SQL Server** schemas to handle these complex multi-step workflows.
- **Saigontourist Enterprise CRM:** Maintained and enhanced loyalty programs and member card management using **.NET** and **SQL Server**. Engineered robust backend services to seamlessly extract and synchronize real-time transaction data from the enterprise Data Warehouse (DW), optimizing data processing workflows.
- **BMWindows Internal Portal & CMS:** Developed an App Launcher portal and Admin CMS using **.NET** for dynamic management of system resources (icons, URLs, application statuses). Improved system usability and maintainability through modular architecture and structured data management.

Fullstack Developer Intern

Computing Community and Technology Corporation — Ho Chi Minh City.

8/2025 – 12/2025

- **Admin Web Application (CMS):** Built an end-to-end full-stack Content Management System for article and account management using **ReactJS** and **ASP.NET Core**.
- **API & Security:** Designed and integrated secure **RESTful APIs** with **JWT Authentication** to handle user sessions, data access controls, and role-based permissions.
- **UI/UX & Database:** Implemented dynamic data rendering with advanced pagination and filtering functionalities on the frontend, supported by a well-structured **SQL Server** database architecture.

Project

AI Text-to-SQL Service (Solo Project) | *React, Python, FastAPI, PostgreSQL, Docker, LLM*

- **Demo:** https://ai-texttosql.onrender.com/

- **AI Integration & Backend:** Engineered an AI-powered service using **Python** and **FastAPI**, integrating external LLM APIs via advanced prompt engineering to accurately convert natural language into **PostgreSQL** queries.
- **Frontend UI/UX:** Built an intuitive, user-friendly interface using **React** to improve data accessibility for non-technical users, demonstrating strong UI/UX design capabilities.
- **Deployment:** Containerized the entire full-stack application using **Docker** for consistent deployment and scalability, reflecting proactive research of modern technologies.

TechStore E-commerce Platform (Solo Project) | *ASP.NET MVC, SQL Server, Entity Framework*

- **GitHub:** https://github.com/vqt2129a/techstore-aspnetmvc-ecommerce
- **System Architecture:** Designed and developed an end-to-end e-commerce workflow (catalog, cart, order processing) utilizing **ASP.NET MVC, Entity Framework**, and **SQL Server**.
- **Security & UI:** Developed secure server-rendered UIs using **Razor**, implementing robust JWT/role-based authentication and authorization to ensure secure user experiences.
- **Code Quality:** Applied strict MVC architecture to ensure separation of concerns, high maintainability, and structured data management.
